

The ESP resistor series is the ideal solution for high pulse load / low frequency applications. High thermal capacity, suitable for applications without air cooling (better performance with cooling). The resistors are used in dumping or braking circuit.

Features

- High pulse rating (ask for details)
- Absorb high pulse energy within short period
- High quality ceramic cylinder body with brass terminals
- Good pulse load capability
- Non-Inductive design
- ROHS compliant
- Housing materials in accordance with UL 94 V-0
