General Specifications

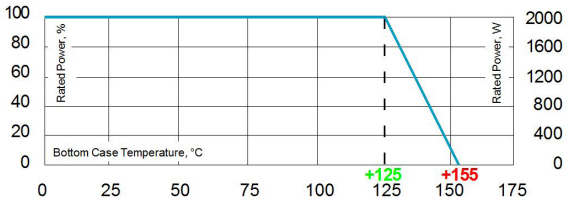
Electric support
Alumina ceramic metalized with EBG ALTOX film on the bottom for improved heat transfer and optimum discharge

Encapsulation
Resin-filled epoxy casing with large creeping distance to mass, large air distance between the terminals and high insulation resistance (CTI 600)

Resistance Element
Special design for low inductance and capacitance values. The element employs our special METOXFILM, which demonstrates stability while covering high wattage and pulse loading

Housing
Housings are made without color additives. The color definition is natural and can vary in different pigmentation

Contacts
- Easy load connection with M4 and M5 screws (Inch thread terminals on request)
- Connector height available from 25 to 42 mm
- Various sleeves for increasing creeping distance up to 85 mm or potted cable connections are available on request
- Contacts standard M5 (M4 on special request - connection screw thread max. 7 mm



Derating (thermal resist.) UXP®-2000: 66.6 W/K (0.015 K/W)
Power rating: 2,000 W at 125°C bottom case temperature*
Please ask for detailed mounting procedure!

* Best results can be reached by using a thermal transfer compound with a heat conductivity of at least 2.9 W/mk. The flatness of the cooling plate must be better than 0.05 mm overall. Surface roughness should not exceed 6.4 µm.
